REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

County Council of Dorchester County, Maryland

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of Dorchester County, Maryland (the County) as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the County's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

The County's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these basic financial statements based on our audit. We did not audit the basic financial statements of the Board of Education of Dorchester County and the Dorchester County Sanitary Districts (the Component Units). Those basic financial statements were audited by other auditors whose report thereon has been furnished to us, and our opinion, insofar as it relates to the amounts included for the Component Units, is based solely on the report of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the basic financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the basic financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the basic financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the basic financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the basic financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the report of the other auditors, the basic financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component unit, each major fund, and the aggregate remaining fund information, of the County, as of June 30, 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, required supplementary information, and budget and actual schedules, as individually listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the management's discussion and analysis, required supplementary information, and budget and actual schedules as listed in the table of contents, in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the County's basic financial statements. The combining and individual fund statements and Local Management Board – schedule of revenue and expenditures, as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The combining and individual fund statements and Local Management Board – schedule of revenue and expenditures, as listed in the table of contents, are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying combining and individual fund statements and Local Management Board - schedule of revenue and expenditures, as listed in the accompanying table of contents are fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated March 12, 2018 on our consideration of the County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the County's internal control over financial reporting and compliance.

Hunt Valley, Maryland March 12, 2018

Management's Discussion and Analysis June 30, 2017

Dorchester County Government's (the "County") discussion and analysis is designed to: (a) assist the reader in focusing on significant financial issues, (b) provide an overview of the County's financial activity, (c) identify changes in the County's financial position (its ability to address the next and subsequent years' challenges), (d) identify any material deviations from the financial plan (the approved budget), and (e) identify individual fund issues or concerns.

Since the Management's Discussion and Analysis (MD&A) is designed to focus on the current year's activities, resulting changes and currently known facts, please read it in conjunction with the County's financial statements presented herein.

This discussion and analysis is intended to serve as an introduction to the County's basic financial statements. The County's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains 4) supplementary information in addition to the basic financial statements themselves.

1) Government-wide Financial Statements

The government-wide financial statements are designed to provide readers with a broad overview of the County's finances, in a manner similar to a private business. The government-wide financial statements include a *statement of net position* and a *statement of activities*.

- □ The *statement of net position* presents information on the County's entire assets and liabilities, with the difference between the two reported as net position. Over time, increases and decreases in net position may serve as a useful indicator of whether the financial position of the County is improving or deteriorating.
- The *statement of activities* presents information showing how the government's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of these financial statements distinguish functions of the County that are principally supported by taxes and intergovernmental revenues (governmental activities) and activities from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities).

- □ The *governmental activities* of the County include general government, public safety, public works, education, social services, natural resources, recreation/parks, and economic development.
- □ The *business-type activities* of the County include airport and solid waste operations.

Management's Discussion and Analysis June 30, 2017

The government-wide financial statements include not only the County (known as the primary government), but also include the Dorchester County Board of Education and the Dorchester County Sanitary Districts as legally separate component units that are reported separately from financial information presented for the primary government itself.

The government-wide financial statements can be found on pages 12-14 of this report.

2) Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The County, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the County can be divided into on of three categories: *governmental*, *proprietary*, or *fiduciary*.

□ Governmental Funds. Governmental funds are used to account for the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenue, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The County maintains six individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenue, expenditures, and changes in fund balances for the General, Special Revenue Grants, Capital Projects, Building Excise Tax, Transfer Tax, and Commissary.

The County adopts an annual appropriated budget for all of its governmental and proprietary fund budgets.

The basic governmental fund financial statements can be found on pages 15-18 of this report.

Proprietary Funds. When the County charges customers for a service it provides, whether to outside customers or to other units of government, these services are generally reported in proprietary funds. Proprietary funds are reported in the same way that all activities are reported in the statement of net assets and the statement of activities. Proprietary funds are comprised of two types: 1) Enterprise funds and 2) Internal service funds. The County uses enterprise funds to account for its airport and landfill operations. Internal service funds are used to report an activity that provides supplies and services for the government's other programs and activities. The County does not utilize an internal service fund.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail.

The basic proprietary fund financial statements can be found on pages 19-21 of this report.

□ *Fiduciary Funds*. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statement because the resources of those funds are not available to support the County's own programs. The accounting used for fiduciary funds is similar to proprietary funds.

The basic fiduciary fund financial statements can be found on pages 22-23 of this report.

3) Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 24-54 of this report.

4) Supplementary Information

In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information concerning the County's progress in funding its obligation to provide pension benefits to its employees and includes budgetary comparison schedules for the general fund.

In addition to this MD&A, required supplementary and other information can be found on pages 57-74 of this report.

Financial Analysis on Government-Wide Financial Statements

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the County, assets exceeded liabilities by \$40.6 million as of the close of the most recent fiscal year.

Net Investment in Capital Assets	40,446,859	40,446,859	18,715,957	15,483,670	59,162,816	55,930,529	6%
Restricted Net Position	338,465	342,679	-	-	338,465	342,679	-1%
Unrestricted Net Position (Deficit)	(24,145,805)	(22,947,881)	5,259,850	4,376,455	(18,885,955)	(18,571,426)	2%
Total Net Position	\$ 16,639,519	\$ 17,841,657	\$ 23,975,807	\$ 19,860,125	\$ 40,615,326	\$ 37,701,782	8%

The largest portion of the County's net position reflects its investments in capital assets (e.g., land, roads, and bridges); less related outstanding debt used to acquire those assets in the amount of \$59.2 million. The County uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the County's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. An additional portion of the County's net position, \$0.3 million, represents resources that are subject to external restrictions on how they may be used. The remaining portion is unrestricted net deficit of (\$18.9) million.

Unrestricted net position in governmental activities has been reduced by \$19.0 million in long-term debt, resulting in unrestricted net deficit of (\$24.1) million. This long-term debt was incurred by the County's general fund for the purpose of capital asset acquisition for the Board of Education of \$17.3 million and Chesapeake Community College of \$1.7 million. The capital assets acquired with these bonds are not reflected in the County's primary government financial statements.

The County's total net position increased by \$2.9 million during fiscal year 2017; total net position as of June 30, 2017 was \$40.6 million, representing a 7.7% increase.

Governmental Activities (government-wide) - Change in Net Position:

Net position in governmental activities decreased by \$1.2 million.

Business-type Activities (government-wide) - Change in Net Position:

Business-type activities increased the County's net position by \$4.1 million.

Governmental Funds:

The focus of the County's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the County's financing requirements. In particular, fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the County's governmental funds reported combined fund balances of \$10.3 million, a decrease of \$0.4 million. Approximately \$0.3 million is restricted and \$3.5 million is committed.

Original Budget vs. Final Budget:

The final budget was virtually unchanged from the original budget.

Final Budget vs. Actual Results:

Revenues were under budget by \$1.4 million, expenditures were under budget by \$0.7 million, and transfers out were under budget by \$0.1 million, yielding a \$0.5 million net decrease.

Capital Asset Administration – Government Wide Statements

The County's investment in capital assets for its governmental and business-type activities as of June 30, 2017, amounts to \$69.2 million (net of depreciation). This investment in capital assets includes land, buildings, bridges, roads, equipment, and operational facilities.

Major capital asset events, excluding education, during the current fiscal year included the following:

Airport parking and apron improvements (\$2.7 million) and acquisition of heavy equipment for the public works department (\$1.1 million).

Additional information on the County's capital assets can be found in note 3 on pages 36-39 of this report.

Debt Administration

At the end of the current fiscal year, the County had total outstanding long-term liabilities of \$57.4 million. This amount was primarily comprised of debt backed by the full faith and credit of the County of \$22.1 million and post-retirement obligations of \$27.4 million. The debt decreased by a net of \$1.9 million, primarily a result of scheduled debt payments.

The County's credit ratings for fiscal year 2017 are as follows: 1) Standard and Poor's rated A+, and 2) Moody's Investors Service rated Aa3. Additional Information on the County's long-term debt can be found in note 4 on pages 40-43 of this report.

Economic Factors and Fiscal Year 2018

The adopted FY 2018 total budget equals \$57.6 million, an increase of \$500,000 or less than 1% over the FY 2017 budget. The FY 18 capital budget of \$26.3 million represents an increase of \$18.2 million over the FY 17 capital budget – made up of \$11.9 million for the new North Dorchester High School and \$10 million to replace the emergency communication radio system. The Council's priorities in crafting the FY18 budget were maintaining essential services to the public and continuing the revived long term capital investment program while avoiding increasing local tax rates.

Adopted property tax rates were equal to or below both the current rate and the constant yield tax rate.

Requests for Information

This financial report is designed to provide a general overview of the County's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Dorchester County Government, Department of Finance, 501 Court Lane, Cambridge, Maryland 21613 or sent by email to mspears@docogonet.com.

Reconciliation of Statement of Revenue, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities For the Year Ended June 30, 2017

Net changes in fund balances in governmental funds			\$ (355,262)
Amounts reported for governmental activities in the statement of activities are different because:			
Governmental funds report capital outlay as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlay exceeded depreciation in the current period.			
Capital outlay capitalized	\$	2,180,595	
Depreciation and loss on disposal		(2,630,530)	(449,935)
Bond and capital lease proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net position. Repayment of bond, capital lease and installment purchase principal is an expenditure in the governmental funds, but the repayments reduce long-term liabilities in the statement of net position. This is the amount by which proceeds exceeded repayments.			
Net pension liability and related deferred outflows and inflows	\$	(354,351)	
Compensated absences and pension liability		(25,679)	
OPEB liability Payments of debt principal		(1,939,459) 1,805,779	(513,710)
27	-	,,-	(610,710)
Revenue and expenditures are reported in the statement of activities on the accrual basis and in the governmental funds when they provide or use current financial resources. This is the net difference of revenues and expenditures recognized between the governmental funds and statement of			
activities.			116,769
Change in net position of governmental activities			\$ (1,202,138)

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity

The primary government is Dorchester County, Maryland, referred to herein as the County or Dorchester County. The County is a political subdivision of the State of Maryland established in 1669 and subsequently incorporated under Article 25 of the Annotated Code of the State of Maryland and is governed by an elected five-member County Council. The County government directly provides all basic local governmental services.

The accompanying financial statements are presented as of June 30, 2017 and for the year then ended and have been prepared in conformity with accounting principles generally accepted in the United States of America applicable to local governments. The Governmental Accounting Standards Board (GASB) is the standard setting body for establishing governmental accounting and financial reporting principles, which are primarily set forth in the GASB's Codification of Governmental Accounting and Financial Reporting Standards (GASB Codification).

Financial Reporting Entity

The accompanying financial statements comply with the provisions of the GASB Standards in that the financial statements include all organizations, activities, functions and component units for which the County (the primary government) is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either (1) the County's ability to impose its will over the organization, or (2) the potential that the organization will provide a financial benefit to or impose a financial burden on the County.

Based on the foregoing, the County's financial reporting entity includes all funds, agencies, boards and commissions that are part of the primary government, and the component units discussed below.

Discretely Presented Component Unit - The component unit columns in the government-wide financial statements include the financial data of the County's two discretely presented component units, the Board of Education of Dorchester County (the Board) and the Dorchester County Sanitary Districts (the Sanitary Districts). They are reported in separate columns to emphasize that they are legally separate from the County. Although these organizations are legally separate entities, they are included in the financial statements of the County because the County is financially accountable for each organization. Copies of the financial statements for the component units can be obtained from the County Council's office in Cambridge, Dorchester County, Maryland.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial Reporting Entity (continued)

The *Board of Education of Dorchester County* is a separately elected body that administers the public school system in the County. The Board is organized as a separate legal entity, but does not have the power to levy taxes or issue bonds. The Board's budget is subject to approval by the County council, and the Board receives a significant portion of its operational and capital project funding from the County.

The *Dorchester County Sanitary Districts* is a separate political and corporate body created by the Commissioners of Dorchester County, Maryland, and comprised of a sewer operation, two water districts and a shared facility with the County.

Basis of Presentation

The County's basic financial statements consist of government-wide financial statements, including a statement of net position and a statement of activities, and fund financial statements, which provide a more detailed level of financial information.

Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenue, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The statement of net position presents the financial condition of the governmental and business-type activities of the County at year end. The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenue of the County's governmental activities and business-type activities. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenue includes: 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment, and 3) interest earned on grants that are required to be used to support a particular program. Taxes and other items not properly included among program revenue are reported as general revenues of the County, with certain limited exceptions. The comparison of direct expenses with program revenues identifies the extent to which each governmental program or business activity is self-financing or draws from the general revenues of the County.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Government-Wide and Fund Financial Statements (continued)

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter is excluded from the government-wide financial statements, to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the County at a more detailed level. The focus of governmental and proprietary fund financial statements is on major funds. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements. Non-major funds are aggregated and presented in a single column.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenue in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, only current assets and current liabilities are generally included on the balance sheet. Revenue is recognized as soon as it is both measurable and available. Revenue is considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenue to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Non-exchange transactions, in which the County receives value without directly giving equal value in return, include property taxes, sales taxes, grants, entitlements, and donations. On the accrual basis, revenue from property taxes is recognized in the year for which the taxes are levied. Revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the year when use is first permitted, matching requirements, in which the County must provide local resources to be used for a specified purpose, and expenditure requirements, in which the resources are provided to the County on a reimbursement basis. On a modified accrual basis, revenue from non-exchange transactions must also be available before it can be recognized.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Measurement Focus, Basis of Accounting, and Financial Statement Presentation (continued)

Under the modified accrual basis, the following revenue sources are considered to be both measurable and available at year end: charges for services, fines and forfeitures, statelevied locally shared taxes, interest, grants, fees, and rentals.

The County's other post-employment benefit plan financial statements are prepared using the accrual basis of accounting. Employer contributions to the plan are recognized when due and the employer has made a formal commitment to provide contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

Differences in the accrual and the modified accrual basis of accounting arise in the recognition of revenue, the recording of unearned revenue, and in the presentation of expenses versus expenditures.

The government reports the following major governmental funds:

The General Fund is the general operating fund of the County. It is used to account for all financial resources except those required to be accounted for in another fund.

Special Revenue Funds are used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specific purposes. The Special Revenue Grants Fund, which includes Local Management Board (LMB) grant activity, the Tax Funds (see more detail below), and the Commissary fund are all special revenue funds of the County.

The Capital Projects Fund is used to account for financial resources to be used for the acquisition, construction, or renovation of major capital facilities in the governmental funds, including educational facilities, roads, and similar governmental capital assets (other than those financed by the proprietary funds).

The Building Excise Tax fund is a special revenue fund for building excise tax revenue. Revenues in this fund are derived from an excise tax on new residential or commercial developments and are dedicated for capital expenditures towards school construction, public safety communications, and the Sheriff's Office. The Transfer Tax fund is a special revenue fund for transfer tax revenue. The transfer tax is imposed on transfers of property at a rate of 0.75%, with the first \$30,000 of consideration exempt for residential transfers. These revenues are dedicated for courthouse debt service, maintenance and security, as well as public school facilities.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Measurement Focus, Basis of Accounting, and Financial Statement Presentation (continued)

Proprietary fund reporting focuses on the determination of operating income, changes in net position, financial position, and cash flows. The County's enterprise funds may be used to account for any business-type activities for which a fee is charged to external users for goods or services. The following are the County's major enterprise funds:

The Landfill Fund is used to account for the fees collected at the County landfills for the dumping of waste.

The Airport Fund is used to account for the financial resources to be used for the operation or construction of airport facilities.

Additionally, the government reports the following fiduciary fund to account for assets held by the County in a trustee capacity:

The Other Postemployment Benefits Trust Fund (OPEB) is used to account for assets that are required to be held in a trust for members and beneficiaries of the postemployment benefit plan.

In addition to assets, the statement of financial position and/or balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s), and so will not be recognized as an outflow of resources until that time. The County has deferred outflows of resources related to pensions.

In addition to liabilities, the statement of financial position and/or balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s), and so will not be recognized as an inflow of resources (revenue) until that time. The County has two types of this item, one which arises only under a modified accrual basis of accounting that qualified for reporting in this category. Accordingly, the item, unavailable revenue, is reported only in the governmental fund balance sheet. The governmental funds report unavailable revenues from property taxes. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. The second type referred to deferred inflows of resources related to pensions.

Amounts reported as program revenue include: 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions. Internally dedicated resources are reported as general revenue rather than as program revenue. Likewise, general revenue includes all taxes.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Measurement Focus, Basis of Accounting, and Financial Statement Presentation (continued)

On the accrual basis of accounting, expenses are recognized at the time they are incurred. The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the related fund liability is incurred, if measurable. Allocations of cost, such as depreciation and amortization, are not recognized in governmental funds.

Proprietary funds, like the government-wide financial statements, are accounted for using a flow of economic resources measurement focus. Proprietary funds distinguish operating revenue and expenses from non-operating items. Operating revenue and expenses generally result from producing and delivering goods and providing services and use of properties in connection with a proprietary fund's principal ongoing operations. For the County, the principal operating revenue of the enterprise funds are charges for services for sanitary landfill, airport fuel sales and airport rental fees. For the Board, these revenues are sales of food service. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation of capital assets. All revenue and expenses not meeting this definition are reported as non-operating revenue and expenses.

All funds, other than agency funds, are legally required to be budgeted and appropriated. The budget is prepared on the budgetary basis of accounting. The budget establishes a limit on the amounts that the County may appropriate and sets annual limits as to the amounts of expenditures at a level of control selected by the County. The legal level of control has been established by the County at the category level within each fund.

The budget may be amended during the year if projected increases or decreases in revenue are identified. The amounts reported as the original budgeted amounts in the budgetary statements reflect the amounts when the original budget was adopted. The amounts reported in the final budgeted amounts reflect amendments approved by the County during the year.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the County to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses/expenditures during the reporting period. Actual results could differ from those estimates.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the County as assets with an initial individual cost of \$5,000 or greater for all funds. All assets are recorded at historical cost or estimated historical cost, except for donated capital assets which are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or do not materially extend the life of the asset are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Property, plant, equipment and infrastructure assets, except land and construction in progress, of the primary government, as well as the component units, are depreciated using the straight line method over the following estimated useful lives:

Description	Governmental Activities Estimated Lives	Business-Type Activities Estimated Lives
Buildings and Improvements	10 – 40 years	20 – 40 years
Furniture and Equipment	3-40 years	3 -15 years
Vehicles	1-10 years	3-8 years
Infrastructure	10 - 50 years	5 – 23 years

Investments

Investments are stated at fair value based on quoted market values. Under the terms of repurchase agreements, the excess cash from checking accounts is invested in short-term investments. All deposits are insured by FDIC or a surety bond. Short-term investments in U.S. Treasury and agency obligations that have remaining maturities of 90 days or less, provided that the fair value of those investments is not significantly affected by impairment, are reported at amortized cost, which approximates market value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Investments that do not have an established market are reported at estimated fair value.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Interfund Receivables and Payables

On the fund financial statements, receivables and payables resulting from short-term interfund loans or interfund services provided and used are classified as Interfund Receivables/Payables. Interfund balances within governmental activities and within business-type activities are eliminated on the government-wide statement of net position. The only interfund balances which remain on the government-wide statement of net position are those between governmental and business-type activities. These amounts are reflected as Internal Balances.

Inventories

Inventories of the government-wide financial statements and the fund financial statements of proprietary funds consist of expendable supplies held for consumption and items held for sale. These items are presented at the lower of cost or market on a first-in, first-out method and are expensed when used.

Compensated Absences

Vacation and Sick Leave

Vacation benefits are earned by employees of the reporting entity based on time in service, and the rights to such benefits are vested. Sick leave is also accumulated by employees based on time in service. However, accumulated sick leave benefits do not vest and are not paid unless sickness causes employees to be absent.

Upon retirement, employees of the Board of Education (a component unit) (the Board) receive severance pay for unused sick leave accumulated for service while employed at the Board. This estimated liability is computed on the accumulated sick leave of Board employees who have 20 years of service with the Board at the rate of \$30 per day. In addition, employees are granted vacation benefits in varying amounts depending on tenure. Compensated absences are reported as accrued in the government-wide and proprietary financial statements. Governmental funds report only matured compensated absences payable to currently terminating employees, which are included in other accrued expenses.

Accrued Liabilities and Long-Term Obligations

In the government-wide financial statements and proprietary funds financial statements, all payables, accrued liabilities and long-term debt obligations are reported as liabilities in the applicable governmental activities, business-type activities, and proprietary fund statements of net position.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Accrued Liabilities and Long-Term Obligations (continued)

In general, governmental fund payables and accrued liabilities that, once incurred, are paid in a timely manner and in full from current financial resources are reported as obligations of the funds. However, claims and judgments and compensated absences that will be paid from governmental funds are reported as a liability in the fund financial statements only to the extent that they are due for payment during the current year. Loans and capital leases are recognized as a liability on the fund financial statements when due.

Real Estate and Personal Property Taxes

The County's property tax is levied each July 1st, at rates enacted by the Board of County Commissioners based on the total assessed value as determined by the Maryland State Department of Assessments and Taxation. The rates of levy cannot exceed the constant yield tax rate furnished by the Maryland State Department of Assessments and Taxation without public notice and only after public hearings. A reassessment of all property is required to be completed every three years.

Property taxes are levied as of July 1st. Taxpayers also have the options of paying in full without interest by September 30th, or paying their tax bills semi-annually. Taxpayers electing the semi-annual method can pay the first installment without interest by September 30th. Beginning October 1st, interest is charged. The second semi-annual payment, including a service charge, is due by December 31st. Interest accrues at one percent monthly for delinquent property taxes.

Maryland law provides that unpaid real estate property taxes shall be a lien on the real property on October 1st for non-owner occupied properties and January 1st for owner occupied properties. If real estate property taxes remain unpaid, the collector shall sell the real properties at tax sale no later than two years from the date taxes are in arrears. The County bills and collects its own taxes. County property tax revenue is recognized when collected.

Cash and Cash Equivalents

For the purposes of the statement of cash flows, the proprietary funds have defined cash equivalents as all highly liquid deposits and other investment instruments that have a maturity of three months or less.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Net Position and Fund Equity

The difference between fund assets and liabilities is "Net Position" on the government-wide and fiduciary fund statements and "Fund Balance" on governmental fund statements. Net Position is classified as "Net Investment in Capital Assets," legally "Restricted" for a specific purpose or "Unrestricted" and available for appropriation for general purposes.

Net investment in capital assets, net of related debt, consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. In the governmental fund financial statements, non-spendable and restricted fund balances represent amounts that are legally restricted for use for a specific purpose because of the County charter or code, state or federal laws, or externally imposed conditions by grantors or creditors, or are otherwise not available for appropriation because they are in a nonspendable form or because they are legally or contractually required to be maintained intact. Committed fund balance represents amounts that are reserved for a particular purpose by the County Council of Dorchester County and would require formal action to release the fund balance from its commitment. Assigned fund balance represents tentative management plans that are subject to change. Unassigned are amounts not included in other spendable classifications.

When both restricted and unrestricted resources are available for use, it is the government's policy to use restricted resources first, and then unrestricted resources as they are needed. Furthermore, committed fund balances are reduced first, followed by assigned amounts, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of those unrestricted fund balance classifications can be used.

Interfund Transactions

Transfers between governmental and business-type activities on the government-wide financial statements are reported in the same manner as general revenues.

Exchange transactions between funds are reported as revenues in the seller funds and as expenditures/expenses in the purchaser funds. Flow of cash or goods from one fund to another without a requirement for repayment are reported as interfund transfers. Interfund transfers are reported as other financing sources/uses in governmental funds and after nonoperating revenues/expenses in enterprise funds. Repayments from funds responsible for particular expenditures/expenses to the funds that are initially paid for them are not presented on the financial statements.

Notes to the Financial Statements June 30, 2017

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Implementation of New Accounting Principles

The GASB issued Statement No. 74 entitled, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans; GASB Statement No. 75, entitled, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions; GASB Statement No. 77; entitled, Tax Abatement Disclosures; GASB Statement No. 80, entitled, Blending Requirements for Certain Component Units; GASB Statement No. 82, entitled, Pension Issues; GASB Statement No. 83, entitled, Certain Asset Retirement Obligations; GASB Statement No. 84, entitled, Fiduciary Activities; GASB Statement No. 85, entitled, Omnibus 2017; GASB Statement No. 86, entitled, Certain Debt Extinguishment Issues; GASB Statement No. 87, entitled, Leases which will require adoption in the future, if applicable. The County adopted Statements 74, 77, 80, and 82 during the year end June 30, 2017 with no material effect to the financial statements. The County is analyzing the effects of the remaining pronouncements and plans to adopt them as applicable by their effective date. The County expects GASB statement No. 75 will have a material effect on the County's financial statements and will result in an approximate adjustment of \$10.9 million.

2. CASH AND SHORT-TERM INVESTMENTS

County

The County is authorized to invest unexpended revenues from taxation, bond sales, lawful distributions from other governmental agencies, or any other funds properly received by it, until it determines the funds are needed for proper public purpose. The County can invest such funds in federally insured banking institutions which pledge United States Treasury bills, notes, or other obligations to secure such deposits, or in U.S. Treasury and agency obligations, repurchase agreements, collateralized certificates of deposit, bankers' acceptance, or money market mutual funds.

Deposits

As of June 30, 2017, the carrying amount of the County's deposits was \$22,685,059 and the bank balances were \$23,473,826. As required by law, each depository is to pledge securities in addition to FDIC insurance at least equal to the amount on deposit at all times. The depository banks pledge collateral for specific accounts which are held in the County's name at several banks. As of June 30, 2017, the bank deposits were fully insured or collateralized.

Notes to the Financial Statements June 30, 2017

2. CASH AND SHORT-TERM INVESTMENTS (continued)

Board of Education of Dorchester County

As of June 30, 2017, the Board had bank deposits with various commercial banks totaling \$2,128,885 (carrying value \$1,878,630). As required by law, each depository is to pledge securities at least equal to the amount on deposit at all times in addition to insurance provided by the FDIC. The depository banks pledge collateral for specific accounts which are held in the Board's name at the Bank of New York Mellon. As of June 30, 2017, the bank deposits were fully insured or collateralized.

Investments consist of \$3,454,375 of U.S. Government securities made through the State of Maryland Local Government Investment Pool (MLGIP) which provide local government units of the State a safe investment vehicle for short-term investment of funds. The State Legislature created MLGIP with the passage of Article 94 22G of the Annotated Code of Maryland. The MLGIP is managed by PNC Safe Deposit and Trust Company, which is under administrative control of the State Treasurer. A MLGIP Advisory Committee of current participants has been formed to review the activities of the Fund on a quarterly basis and provide suggestions to enhance the pool. The MLGIP is rated AAAm by Standard and Poors. The fair value of the pool is the net asset value of the pool shares investments are recorded at cost, which approximates market value. Statutes authorize the Board to invest in obligations of the U.S. Treasury and U.S. Agencies, municipal securities and repurchase agreements, collateralized certificates of deposit, banker's acceptance or money market funds. There are no redemption requirements or funding commitments.

The Board's exposure to investment rate and credit risk is minimal, as all investments are in cash and MLGIP and are thus precluded from having to sell below original cost. Custodial credit risk is mitigated by attempting to have all investments fully collateralized by securities. Cash is invested pursuant to the Annotated Code of Maryland and County Code.

Dorchester County Sanitary Districts

As of June 30, 2017, the Dorchester County Sanitary Districts had bank deposits with various commercial banks totaling \$2,563,667 (carrying value \$2,559,775). Of the bank balance, \$750,000 was covered by federal depository insurance, and \$1,813,667 was covered by collateral segregated on the books of local banks, but not in the Sanitary District's name.

Notes to the Financial Statements June 30, 2017

3. CAPITAL ASSETS

Capital asset activity for the year ended June 30, 2017, was as follows:

Primary Government

	Balance June 30, 2016	Additions	Retirements	Balance June 30, 2017

4. LONG-TERM DEBT AND OBLIGATIONS

The County issues general obligation bonds to provide funds for the acquisition and construction of major capital facilities. General obligation bonds have been issued for both governmental and business-type activities. General obligation bonds are direct obligations and pledge the full faith and credit of the County. These bonds generally are issued as 20-year serial bonds with different amounts of principal maturing each year. General obligation bonds and capital lease obligations currently outstanding are as follows:

	Beginning Balance	Additions	Reductions	Ending Balance	Due Within One Year

Notes to the Financial Statements June 30, 2017

4. LONG-TERM DEBT AND OBLIGATIONS (continued)

Payments on bonds, notes payable, and loans payable that pertain to the County's governmental activities are made by the general fund. Payments on bonds and notes payable that pertain to the County's business-type activities are made by the fund in which the liability exists. The compensated absences liabilities that are attributable to the County's governmental activities are liquidated by the County's general fund. The compensated absences attributable to the County's business-type activities are liquidated by the fund in which the liability exists.

5. LONG-TERM OPERATING LEASES

County

The County has leases for property with separate terms. Approximate future minimum lease commitments are as follows:

Year Ending June 30,	Amount
2018	\$ 129,044
2019	46,147
2020	30,755

Expenses under these leases total approximately \$76,000 for the year ended June 30, 2017.

Board of Education

The Board leases computers, copy machines and internet access service for the majority of the educational system over three to five year terms.

Approximate future minimum lease commitments are as follows:

Year Ending June 30,	Amount
2018	\$ 799,000
2019	299,000
2020	398,000
2021	387,000
2022	339,000
Thereafter	3 589 000

Expenses under these leases total approximately \$467,000 for the year ended June 30, 2017.

Notes to the Financial Statements June 30, 2017

6. INTERFUND RECEIVABLES AND PAYABLES

Due to/from other fund balances as of June 30, 2017 are as follows:

Primary Government	Due f	rom Other Funds	Due	to Other Funds
Government activities	\$	32,898,209	\$	34,208,299
Fiduciary activities		-		674,773
Business-type activities		9,311,543		7,326,680
Total due to/from other funds	\$	42,209,752	\$	42,209,752

7. RETIREMENT PLANS

Summary of Significant Accounting Policies

Pensions. Virtually all employees of the County are members of the Maryland State Retirement and Pension System (the System). The System is considered a single multiple employer cost sharing plan.

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the System and additions to/deductions from the System's fiduciary net position have been determined on the same basis as they are reported by the System. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

General Information about the Pension Plan

Plan Description. Certain employees of the County are provided with pensions through the System—a cost-sharing multiple-employer defined benefit pension plan administered by the Maryland State Retirement and Pension System (MSRPS). The State Personnel and Pensions Article of the Annotated Code of Maryland (the Article) grants the authority to establish and amend the benefit terms of the System to the MSRPS Board of Trustees. MSRPS issues a publicly available financial report that can be obtained at www.sra.state.md.us/Agency/Downloads/CAFR/.

Benefits Provided. A member of the System is generally eligible for full retirement benefits upon the earlier of attaining age 60 or accumulating 30 years of creditable service regardless of age.

Early Service Retirement. A member of the System may retire with reduced benefits after completing 25 years of eligibility service. Benefits are reduced by 0.5% per month for each month remaining until the retiree either attains age 60 or would have accumulated 30 years of creditable service, whichever is less. The maximum reduction for the System member is 30%.

Notes to the Financial Statements June 30, 2017

7. **RETIREMENT PLANS** (continued)

Disability and Death Benefits. Generally, a member covered under retirement plan provisions who is permanently disabled after 5 years of service receives a service allowance based on a minimum percentage (usually 25%) of the member's average final compensation (AFC). A member covered under pension plan provisions who is permanently disabled after accumulating 5 years of eligibility service receives a service allowance computed as if service had continued with no change in salary until the retiree attained age 62. Death benefits are equal to a member's annual salary as of the date of death plus all member contributions and interest.

Contributions. (ERS) The Article sets contribution requirements of the active employees and the participating governmental units are established and may be amended by the MSRPS Board. Employees are required to contribute 6% of their annual pay. The County's contractually required contribution rate for the System for the year ended June 30, 2017, was approximately \$1.2 million, actuarially determined as an amount that, when combined with employee contributions, is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. Contributions to the System from the County were approximately \$1.2 million for the year ended June 30, 2017.

As a result of a 1997 actuarial study of the State Retirement and Pension System of Maryland, the County Commissioners of Dorchester County, Maryland (Highway Department) were identified as one of 23 municipal corporations not having enough assets in the System to fund the present value of accrued benefits for participants in the retirement system. Under rules of House Bills 1348 and 430, the County will repay the \$736,649 fund deficit (an increase of \$7,511 over the prior year) over a period of 40 years. The fiscal year 2017 annual payment was approximately \$42,000, and will increase 5% per year until maturity at December 31, 2035. This liability has been recorded in the governmental activities column on the Statement of Net Position.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

As of June 30, 2017, the County reported a liability of approximately \$12.8 million for its proportionate share of the System's net pension liability. The System's net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The County's proportion of the System's net pension liability was based on a projection of the County's long-term share of contributions to the pension plan relative to the projected contributions of all participating government units, actuarially determined. As of June 30, 2017, the County's proportion for the System was 0.05 percent, which was substantially the same as its proportion measured as of June 30, 2016.

.

Notes to the Financial Statements June 30, 2017

7. **RETIREMENT PLANS** (continued)

For the year ended June 30, 2017, the County recognized pension expense for the System of approximately \$1.5 million. As of June 30, 2017, the County reported deferred outflows of resources and deferred inflows of resources related to ERS from the following sources:

	red Outflows Resources	red Inflows Resources
Contributions subsequent to the measurement date	\$ 1,167,634	\$ -
Actual and expected experience	-	320,049
Change in assumptions	502,630	-
Net difference between projected and actual earnings		
on pension plan investments	 1,548,721	
Total	\$ 3,218,985	\$ 320,049

\$1.2 million reported as deferred outflows of resources related to the System resulting from County contributions subsequent to the measurement date will be recognized as a reduction of the System pension liability in the year ended June 30, 2017. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to the System will be recognized in pension expense as follows:

Year End	
June 30 ,	Amount
2018	\$ 401,168
2019	401,168
2020	612,351
2021	337,576
2022	 (20,961)
	_
Total	\$ 1,731,302

Information included in the MSRPS financial statements. Actuarial assumptions, long-term expected rate of return on pension plan investments, discount rate, and pension plan fiduciary net position are available at www.sra.state.md.us/Agency/Downloads/CAFR/.

Sensitivity of the County's proportionate share of the net pension liability to changes in the discount rate. The County's proportionate share of the System net pension liability calculated using the discount rate of 7.55 percent is \$12,844,506. Additionally, the County's proportionate share of the System net pension liability if it were calculated using a discount rate that is 1-percentage-point lower (6.55 percent) is \$17,630,192, or 1-percentage-point higher (8.65 percent) is \$8,844,957.

Notes to the Financial Statements June 30, 2017

8. POST-EMPLOYMENT HEALTH CARE BENEFITS

<u>Plan Description:</u> The County and the Board administer a single-employer defined benefit healthcare plan (the Plan). The Plan provides healthcare insurance for eligible retirees and their beneficiaries through the County and Board's group health insurance plan, which covers both active and retired members.

The County's employees are eligible upon retirement for employees with 30 years of service at any age or employees who have attained age 55 with at least 16 years of service if enrolled in the active medical plan immediately prior to retiring. Participants are eligible for medical and prescription drug benefits. The spouse of an eligible retiree is also eligible to receive benefits from this plan. Benefits continue for the lifetime of the retiree. Surviving spouses after 1996 are eligible for COBRA coverage for 36 months after the death of the retiree or until Medicare eligibility. As of July 1, 2016, the date of the last actuarial valuation, the Plan included 110 retirees and 202 active employees for a total of 312 participants.

The Board's benefit provisions are based on contractual agreements with employee groups. Employees are eligible to participate in the Plan upon retirement. Participants must meet the eligibility requirements of the Maryland State Teachers' Pension System, which are age 55 with 15 years of service, 30 years of service or age 62 with 5 years of service. The Board is required to perform an actuarial valuation of its post-employment benefits other than pensions at least biennially. As of July 1, 2016, the date of the last actuarial valuation, approximately 327 retirees were receiving benefits, and an 661 active employees are potentially eligible to receive future benefits. The Plan does not issue a stand-alone report.

<u>Funding Policy:</u> The County's eligible employees and their dependents can elect coverage in the Plan. Pre-65 retirees pay the same percentage of the premiums charged as an active for both themselves and their dependents. Post-65 retirees pay 15% of the premiums charged for both themselves and their dependents. Surviving spouses must pay 100% of the premium to continue coverage. For fiscal year 2017, the County contributed \$0 to the Plan for the eligible retirees.

Notes to the Financial Statements June 30, 2017

8. POST-EMPLOYMENT HEALTH CARE BENEFITS (continued)

Annual OPEB Cost and Net OPEB Obligation: The County and Board's annual other postretirement benefit (OPEB) cost (expense) is calculated based on the annual required contribution of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years. The County and Board pays post-retirement benefits (normal cost) from the General Fund.

The following table shows the components of the County and Board's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the County's net OPEB Obligation.

	County		Board
Annual required contribution	\$	1,669,400	\$ 6,692,000
Interest on net OPEB obligation		832,224	799,000
Amortization of net OPEB obligation		(562,165)	-
Adjustment to annual required contribution			(1,020,000)
Annual OPEB cost		1,939,459	6,471,000
Contributions			(1,349,324)
Increase in net OPEB obligation		1,939,459	5,121,676
Net OPEB obligation, beginning of year		11,888,916	22,820,986
Net OPEB obligation, end of year	\$	13,828,375	\$ 27,942,662

The County and Board's annual OPEB cost, the percentage of annual OPEB cost contributed to the Plan, and the net OPEB obligation for the last three years as of June 30, was as follows:

County

			Percentage of Annual	I	Net OPEB
Year Ended June 30,	Annu	al OPEB Cost	OPEB Cost Contributed		Obligation
2017	\$	1,939,459	0.00%	\$	13,828,375
2016		1,623,533	0.00%		11,888,916
2015		1,865,343	0.00%		8,641,850

Board

Year Ended June 30,	Annu	al OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
2017	\$	6,471,000	20.85%	\$ 27,942,662
2016		6,104,000	21.29%	22,820,986
2015		6,274,000	20.54%	18,016,373

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Methods and Assumptions: Projections of benefits for financial reporting purposes are based on substantive plan (the plan as understood by the employer and the plan members) and includes the type of benefits provided at the time of each valuation and the historical pattern of sharing the benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

Notes to the Financial Statements June 30, 2017

8. POST-EMPLOYMENT HEALTH CARE BENEFITS (continued)

In the actuarial valuation for the plan year ending July 1, 2016, the projected unit credit actuarial cost method was used. The actuarial assumptions included an annual healthcare cost trend of 7.35% initially, reduced by decrements to ultimate rate of 4.5%. Assets are valued at their market values. The unfunded actuarial accrued liability (UAAL) is being amortized on an open level dollar amortization over a 30 year period.

Board of Education

In the actuarial valuation for the plan year ending June 30, 2016, the projected unit credit actuarial cost method was used. The actuarial assumptions included a 3.5% investment rate of return (net of administrative expenses) based on the Board's own investments, an annual healthcare cost trend of 5.9% initially, decreasing gradually to 4.1%, and payroll growth of 4%. The UAAL is being amortized on a closed level of percentage of payroll basis over a 30 year period. The remaining amortization period as of July 1, 2016, was 22 years.

GASB 74

GASB Statement No. 74 replaced current accounting standards for reporting Other Postemployment Benefits Plan information beginning in fiscal year 2017. Employer accounting for OPEB continues to be based on previously-existing standards (GASB Statement No. 45). GASB Statement No. 75, which will affect employer OPEB accounting beginning in fiscal year 2018, will use the assumptions and methods included in Statement No. 74. The significant provisions of GASB Statement No. 74 include:

- Reporting a Total OPEB Liability (TOL), similar to an accrued actuarial liability, and basing future employer funding on the amortization of this amount;
- Using a blended discount rate to calculate future liabilities for accounting purposes, to the extent that assets attributable to current members are not sufficient to make all benefit payments; and
- Using the market value of assets to calculate the net OPEB liability, similar to the unfunded actuarial accrued liability.

The TOL at the beginning of the measurement year is measured as of a valuation date of July 1, 2016. The TOL at the end of the measurement year, June 30, 2017, is measured as of a valuation date of July 1, 2016, rolled forward to June 30, 2017.

The components of the net OPEB liability are: TOL: \$28,031,714; Plan Fiduciary Net Position: \$390,895; Employer net OPEB liability: \$24,759,349; and Plan Fiduciary Net Position as a percentage of the total OPEB liability: 1.55%.

Notes to the Financial Statements June 30, 2017

8. POST-EMPLOYMENT HEALTH CARE BENEFITS (continued)

The County's OPEB plan does not have a target allocation or long-term expected real rate of return and is primarily holding only cash as an asset.

The discount rate used to measure the total OPEB liability was 3.58% as of June 30, 2017. The projection of cash flow used to determine the discount rate assumed that the County would not make additional contributions to the OPEB trust and continue to fund the Plan on a pay-as-you-go basis. Based on those assumptions, the OPEB Plan's fiduciary net position was not projected to cover a full year of projected future benefit payments. Therefore, all future benefit payments are discounted at the current index rate for 20-year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher (3.58%). The sensitivity of the net OPEB liability to a 1% change in the projected healthcare cost trend rate and discount rate is as follows:

scount Rate
3.58% 4.58%
24,759,349 \$ 20,237,576
care Trend Rate
Current 1% Increase
24,759,349 \$ 31,084,217

The Board currently does not have a trust for its OPEB plan and therefore GASB 74 is not applicable.

9. **DEFERRED COMPENSATION**

The County offers its employees two deferred compensation plans created in accordance with Internal Revenue Code Section 457 and administered by a third party. The plans, available to all eligible County employees, permit them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency. The County funds all amounts of compensation deferred under the Plans, at the direction of the covered employee, through investments underwritten by Variable Annuity Life Insurance Company (VALIC) and Nationwide. All amounts of compensation deferred under the Plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are solely the property and rights of the deferred compensation plan participants and are not subject to the claims of the County's general creditors.

The County has no liability for losses under the Plan but does have the duty of due care that would be required of an ordinary prudent investor. In accordance with GASB Statement No. 32, adopted by the County in 1998, the Plan's assets are not reported on the combined balance sheet of the County.

Notes to the Financial Statements June 30, 2017

10. LANDFILL CLOSURE AND POST-CLOSURE CARE COST

State and Federal laws and regulations require the County to place a final cover on its landfills when they stop accepting waste. The County is also required to perform certain maintenance and monitoring functions at the site for up to thirty years after closure. It is the County's position that the State of Maryland will require continuous monitoring of all closed landfills with no termination period set for post-closure care, and as such will continue to accrue an estimate for these costs over a thirty-year period. Although closure and post-closure care costs will be paid only near the date or after the date that the landfill stops accepting waste, the County reports a portion of these closure and post-closure care costs as a liability based on landfill capacity used as of each balance sheet date.

The Secretary Landfill stopped accepting waste in 1982. The landfill has been capped and only has post-closure care costs associated with it, currently estimated to be approximately \$10,800 each year for the next thirty years.

The Golden Hill Landfill stopped accepting waste in 1991. The landfill has been capped and only has post-closure care costs associated with it, currently estimated to be approximately \$14,150 each year for the next thirty years.

The Old Beulah Landfill stopped accepting waste in 1991. The landfill has been capped and only has post-closure care costs associated with it, currently estimated to be approximately \$19,800 each year for the next thirty years.

The closure and post-closure care costs associated with the landfills are as follows:

	2016	Current Year Additions (Deductions)	2017
Secretary landfill		(2000000)	
Postclosure care costs	\$ 324,000		\$ 324,000
Golden Hill landfill			
Postclosure care costs	424,500		424,500
Old Beulah landfill			
Closure costs	150,000	(150,000)	-
Postclosure care costs	594,000		594,000
	744,000	(150,000)	594,000
New Beulah landfill- cells 1-4			
Closure costs	3,006,830	47,164	3,053,994
Postclosure care costs	2,327,826	5165,860_	2,493,686
	5,334,656	5 213,024	5,547,680
Total closure and post closure care costs	\$ 6,827,156	5 \$ 63,024	\$ 6,890,180

Notes to the Financial Statements June 30, 2017

10. LANDFILL CLOSURE AND POST-CLOSURE CARE COST (continued)

The above estimates are based on estimated current costs to perform all closure and post-closure care as of June 30, 2017. Actual costs may be higher due to inflation, deflation, changes in technology, or changes in applicable laws or regulations. The County is required by state and federal laws and regulations to meet certain closure and post-closure financial assurance requirements. The County has satisfied these requirements by demonstrating in information submitted by the Director of Finance that they meet the Local Government Financial Test as of June 30, 2017, as specified in 40CFR258.

Though there are currently no legal restrictions on available funds, the County has approximately \$10 million of currently available assets for landfill closure and post-closure care costs. The shortfalls, if any, may need to be covered by any combination of charges to future landfill users, future tax revenues, or additional borrowings.

There are five individual cells at the New Beulah landfill. Closure and post-closure care costs have been accrued and recognized in the financial records as each cell has come online beginning in November 1995. Total accrued closure and post-closure care costs as of June 30, 2017 are estimated to be \$3,053,994 and \$2,493,686, respectively.

11. COMMITMENTS AND CONTINGENCIES

County

Grants

In the normal course of operations, the County receives grant funds from various Federal and state agencies. The grant programs are subject to audit by agents of the granting authority, the purpose of which is to ensure compliance with conditions precedent to the granting of funds. Any liability for reimbursement which may arise as the result of these audits is not believed to be material.

Risk Management

For general, property, excess and environmental liability coverage, the County is a member of the Maryland Local Government Insurance Trust (LGIT). This trust is a public entity risk pool, which is owned and directed by the local governments that subscribe to its coverage, and operates under the terms of a Trust Agreement.

Subscribers to coverage by LGIT share in the risk among participants of the pools as a result, the County's annual premium requirements are affected by the loss experience of the various insurance pools in which it participates. Conversely, favorable performance of certain insurance pools may result in reduced premiums.

Notes to the Financial Statements June 30, 2017

11. COMMITMENTS AND CONTINGENCIES (continued)

The County is fully insured for workers' compensation through commercial insurance and certain employees are bonded to limit the loss to the County in the event of employees committing acts of embezzlement or theft. In addition, due to specific exclusions in the County's insurance, the County also has commercial insurance coverage for property liability at the Airport. There has been no significant reduction in insurance coverage from the prior year by major categories of risk, and amount of settlements have not exceeded insurance coverage for the past three fiscal years.

The County is the defendant in a number of lawsuits arising principally in the normal course of operations. In the opinion of management, the outcome of these lawsuits will not have a material adverse effect on the financial position of the County.

Dorchester County Sanitary District

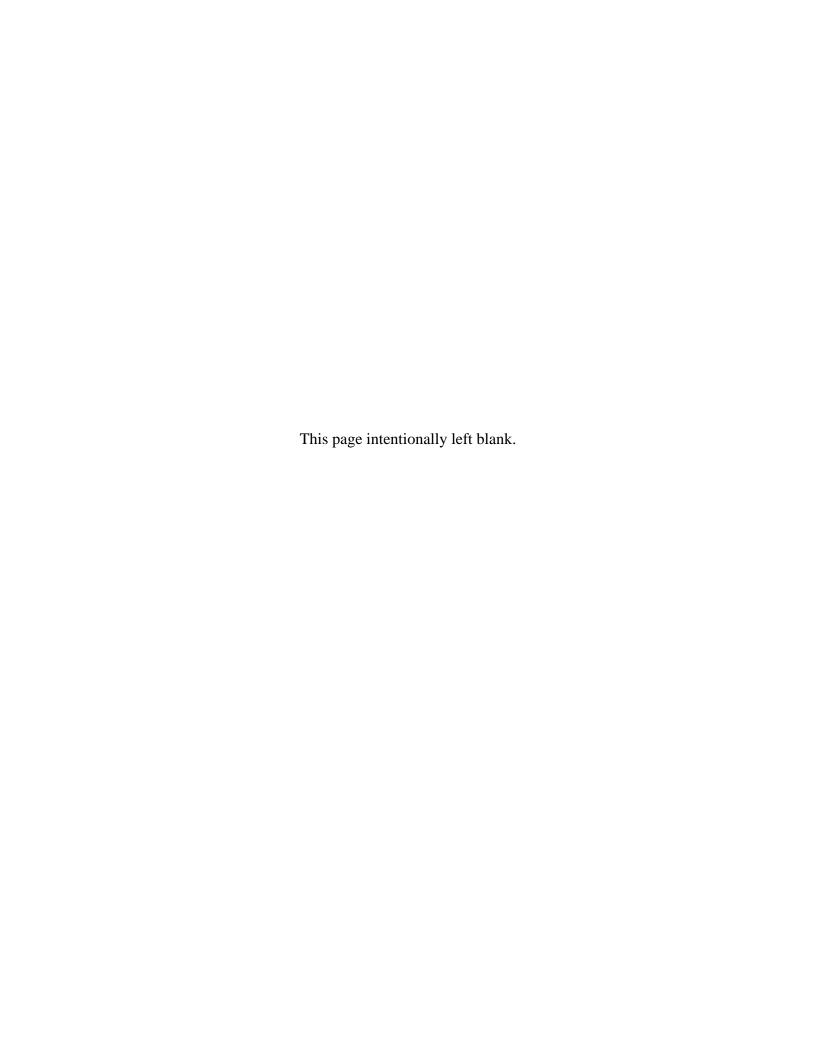

The Sanitary District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; personal injury; and natural disaster. Dorchester County Sanitary District purchases commercial insurance to cover these risks of loss. Settled claims resulting from these risks have not exceeded commercial insurance coverage in any of the past three years.

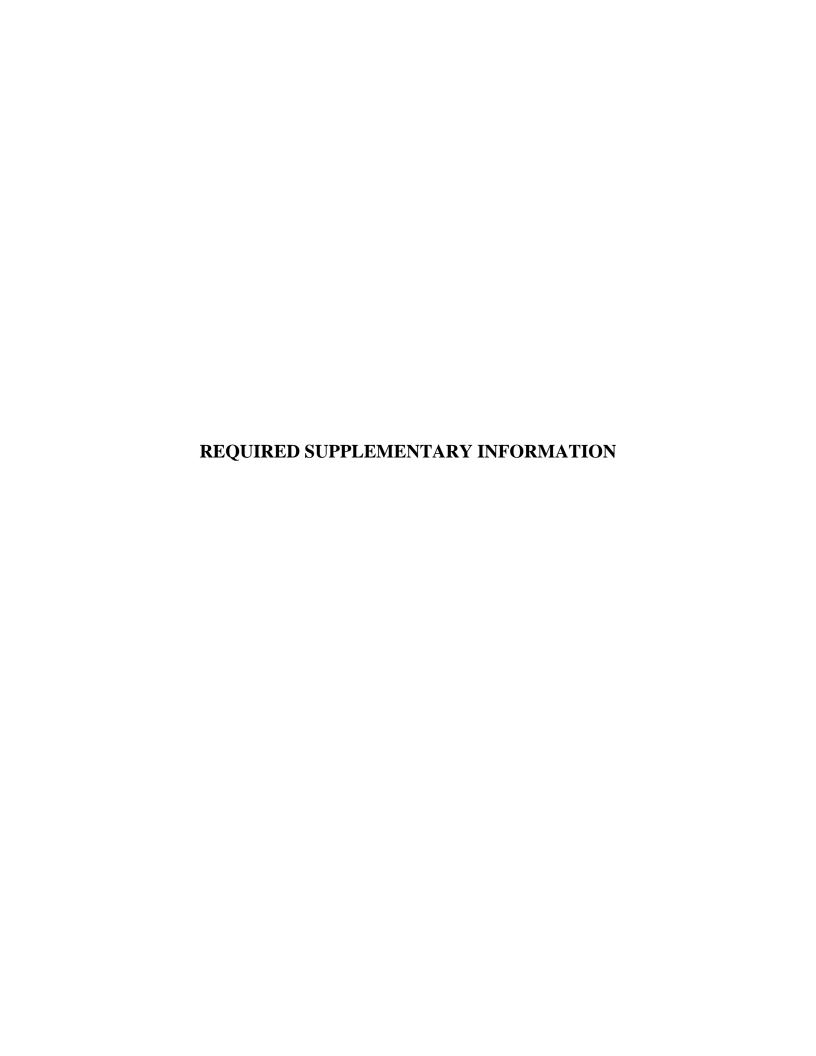

Board of Education of Dorchester County

The Board is a defendant in a number of various lawsuits. After considering all relevant facts and the opinion of legal counsel, it is management's opinion that such litigation will not have a material adverse effect on the financial position of the Board.

The Board is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; personal injury; and natural disaster. In 1986, the Maryland Association of Boards of Education Group Insurance Pool (the Pool) was formed when several Maryland boards of education joined together to pool their casualty risks. Property insurance coverage was added in 1988 and workers compensation in fiscal year 2000. The Board pays an annual premium to the Pool each year which is calculated by an actuary. It is intended that the Pool be self-sustaining through member premiums. Reinsurance is carried through commercial companies for claims which exceed coverage limits as specified in the agreement. Should the Pool encounter deficits in its casualty and/or property funds, such deficits may be made up from assessments of the participant boards on a pro rata basis.

The Board continues to carry commercial insurance for all other risks of loss, including employee health and accident insurance. The Board purchases health insurance from a provider through a modified retrospective rating arrangement agreement. Settled claims have not exceeded insurance coverage for each of the past three fiscal years.
